

Product Pages (PDP)

Extract structured product data from Amazon product detail pages

The Product Detail Page (PDP) endpoint extracts comprehensive product information from any Amazon product page. It returns structured JSON data including the product title, pricing, ratings, images, best seller rankings, and technical specifications (all parsed and ready to use without any HTML processing on your end).

Endpoint

GET <https://api.scrape.do/plugin/amazon/pdp>

Input Parameters

Parameter	Type	Required	Description
token	string	*	Your Scrape.do API authentication token
asin	string	*	Amazon Standard Identification Number (10-character product ID)
geocode	string	*	Country code (e.g., us, gb, de, jp)
zipcode	string		Postal code formatted according to country requirements. Omit to skip the ZIP-locked session; the delivery location then follows the rotator's IP and may vary between requests.
super	boolean		Enable residential/mobile proxies for higher success rates. Costs 10x credits (default: false)
language	string		Language code in ISO 639-1 format (e.g., EN, DE, FR)
include_html	boolean		When true, the response includes the full raw HTML of the page after the structured JSON output (default: false)

Response Parameters

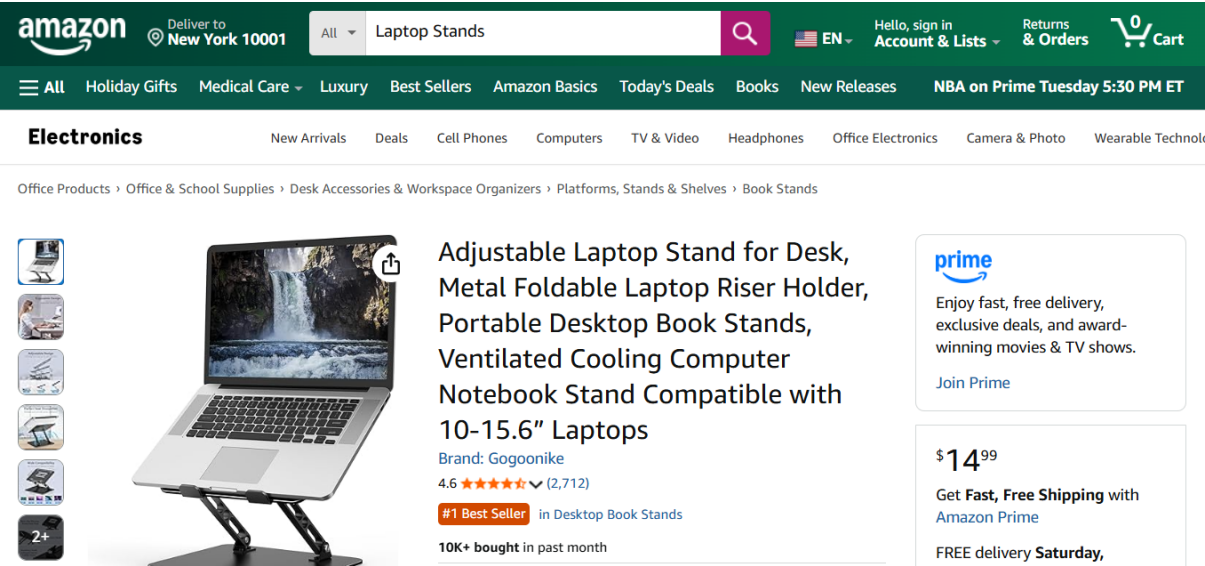

Field	Type	Description
asin	string	Product ASIN number
is_sponsored	boolean	Whether the product is a sponsored listing
brand	string	Brand name
name	string	Full product title
url	string	Canonical product URL
thumbnail	string	Primary product image URL
rating	number	Average star rating (0-5)
total_ratings	number	Total number of customer ratings
price	number	Current selling price
list_price	number	Original list price (if discounted)
currency	string	Currency code (e.g., USD, EUR, GBP)
currency_symbol	string	Currency symbol (e.g., \$, €, £)
is_prime	boolean	Whether Prime shipping is available
shipping_info	array	Shipping and delivery information strings
more_buying_choices	object	Alternative seller options with links
images	array	All product images with URLs and dimensions
best_seller_rankings	array	Category rankings with rank numbers

Field	Type	Description
technical_details	object	Key-value pairs of product specifications
status	string	Request status (success or error)
errorMessage	string	Error message if request failed
html	string	Full raw HTML of the Amazon page (only present when include_html=true)

Example Usage

Step 1: Find the Target Product

Navigate to any Amazon product page. For this example, we'll use an adjustable laptop stand:

Step 2: Get the ASIN

The ASIN (Amazon Standard Identification Number) is the unique 10-character identifier for each product. You can find it in:

- The product URL: amazon.com/dp/B0C7BKZ883 (the ASIN is B0C7BKZ883)
- The product details section on the page

Step 3: Send the API Request

curlpythonnodegorubyjavacsharpphp

```
curl --location --request GET 'https://api.scrape.do/plugin/amazon/pdp?token=<SDO-token>&asin=B0C7BKZ883&geocode=US'
```

Step 4: Receive Structured Data

The API returns a complete JSON object with all product information:

```
{
  "asin": "B0C7BKZ883",
  "is_sponsored": false,
  "brand": "Gogoonike",
  "name": "Adjustable Laptop Stand for Desk, Metal Foldable Laptop Riser Holder...",
  "url": "https://www.amazon.com/dp/B0C7BKZ883",
  "thumbnail": "https://m.media-amazon.com/images/I/71Jz2L1pV6L._AC_SX679_.jpg",
  "rating": 4.6,
  "total_ratings": 2712,
  "price": 14.99,
  "list_price": 39.99,
  "currency": "USD",
  "currency_symbol": "$",
  "is_prime": true,
  "shipping_info": [
    "FREE delivery Monday, December 16",
    "Or fastest delivery Friday, December 13"
  ],
  "more_buying_choices": {
    "heading": "More Buying Choices",
    "offer_text": "New from $14.99",
    "offer_link": "https://www.amazon.com/gp/offer-listing/B0C7BKZ883"
  },
  "images": [
    {
      "url": "https://m.media-amazon.com/images/I/71Jz2L1pV6L._AC_SX679_.jpg",
      "width": 679,
      "height": 679
    }
  ],
  "best_seller_rankings": [
    { "category": "Office Products", "rank": 249 },
    { "category": "Laptop Stands", "rank": 2 }
  ]
}
```

```
],  
  "technical_details": {  
    "Brand": "Gogoonike",  
    "Compatible Devices": "Laptop",  
    "Material": "Aluminum",  
    "Item Weight": "1.1 Pounds"  
  },  
  "status": "success",  
  "errorMessage": null  
}
```

Images are automatically converted to high-resolution URLs. The response is limited to a maximum of 8MB.

Add `include_html=true` to your request to receive the full raw HTML of the Amazon page alongside the structured JSON output. The HTML will be included in an `html` field at the end of the response.
